KVIC Lighting™ Paves Way in Ontario, Canada

March 17, 2015, Toronto, ON – CRS Electronics Inc. (“**CRS**” or the “**Company**”), (TSX-V:LED), a developer and manufacturer of LED lighting products, is pleased to announce another KVIC Lighting™ fixture installation in Ontario, Canada.

“We maintain our equipment under T5 fluorescent high bay lighting, and when a ballast failed we wanted to try something different on our shop floor,” said Devin Vanderlaan, Managing Partner at Van Jon Paving. “On sunny days, we open doors to improve visibility. We installed the 8 foot, high output, linear KVIC Lighting™ fixtures, and it was as if we opened our doors on a sunny day. It was an amazing improvement in the amount and quality of light,” said Mr. Vanderlaan.

“Van Jon Paving will save 85% in energy costs as a result of converting to KVIC Lighting™, and they will no longer have to worry about special hazardous disposal procedures when discarding failed T5 fluorescent lamps,” said Travis Jones, President & CEO of CRS Electronics.

“The KVIC Lighting™ brand is made in North America, and Van Jon Paving selected us partly for that reason. We are grateful customers still care where products are made,” said Jones.

About CRS

CRS Electronics Inc. (TSX-V:LED) is a leader in the emerging, rapidly growing market of high efficiency light emitting diode (“LED”), or, solid-state lighting (“SSL”). The principal activities of CRS Electronics include the development, manufacture and sale, primarily in North America, of indoor lighting products such as LED replacement lamps, exterior LED warning lights for school buses, child safety systems for school buses, LED architectural lighting fixtures, and contract manufacturing of LED circuit boards. As an innovator of LED solutions since 1998, CRS Electronics Inc. continues to expand its product portfolio and market presence with business partners and customers. KVIC Lighting™ and Lumenova™ are two product lines that exemplify CRS Electronics Inc. commitment of expansion.
